[A new comparative formed immediately on OUT, instead of the inherited form UTTER from OE. *ūter* a, *uttra*, which had ceased to show relationship to *out*, cf. *late*, *latier*, *later*. Occasional examples of *outer*, *outter* occur in Chaucer MSS., and the adv. *outerly* was very common in 14-15th c., but, though found in the Bible of 1611, *outer* was not frequent till the 18th c., *utter* being usual in the sense 'exterior' till late in the 17th c.]

The superlatives going with *outer* are OUTMOST and OUTERMOST. Equivalent forms found in late ME or early mod. Eng. (doublets of corresponding forms mentioned under UTTER) are compar. OUTERMORE, OUTMER, superl. OUTEREST. Like the other comparatives of this kind, *outer* is not followed by *than*, we do not say *outer than*.

Obs.* In 2 *utfangene* *peof*, *utfangenthef*, 3 *utefang*, *utfangen*, 3, 4 *outfangen*(e), -*fange*, -*thief* [Answers to an OE type *utfangenne* *peof* (accusative case) 'out-caught thief'; but the expression appears to have come into use later, to match *infangenne* *peof*, *INFANGTHIEF*, q. v.] A franchise of a lord of a private jurisdiction, more extensive than that of *INFANGTHIEF*; originally, the lord's right to pursue a thief (at least when the latter was 'his own man') outside his own jurisdiction, bring him back to his own court for trial, and keep his forfeited chattels on conviction. But the right was variously defined or circumscribed in the 13th c., when its meaning seems to have already become conjectural.

The term *infangenne* *peof* occurs in several OE. Charters, but of *utfangenne* *peof* no trace has been found except in an alleged charter of Egbert dated 828 (Birch *Cartul. Sax.* No. 395), which has the Latin phrase *cum fums comprehensione intus et foris*, 'the apparent equivalent of an OE. *mid infangennum* *peofe* and *utfangennum*'. But this is extant only in the *Liber Rossensis* (1120-50), and may be spurious, or the phrase may be a 12th c. interpolation. The term is wanting from an Eng.-Fr. Glossary of Law Terms compiled 1120-1150 (Wright *Reliq. Antiq.* I. 32) which contains '*infangenneth* = *larrum* plus ens nostre terre'. On the other hand, *utfangenne* *peof* occurs in the forged Charter of Edgar to Glastonbury (Birch, No. 1277), which was in existence before William of Malmesbury made the third version of his *Gesta Regum* 1130-40 (in which the charter is given), and it may thus go back to 1100, or even earlier.

The etymological sense 'out-caught-thief', i. e. 'thief apprehended outside' (the jurisdiction), is that assigned to it in the Ripon record of 1228, in which the grant of 'infangethief and outfangethief' was explained as giving the grantee the right to try 'his own thief' *ubicumque capium*, whether within or without his territorial jurisdiction. But Bracton and *Fleta* explain it as the right to try thieves coming from without, and apprehended within the lord's jurisdiction, they both expressly deny that it meant a thief taken outside, or that such a thief might be brought back into the jurisdiction to be tried. *Fleta* however adds that, after his own thief had been condemned by the outside tribunal, the lord might bring him into his jurisdiction and hang him on his own gallows; and the right to do this appears to be all that Britton knows as 'the franchise of outfangenthief'.

1. The action of putting a person out of the protection of the law, or the legal process by which a person is or was proclaimed or made an outlaw, the condition of one so outlawed. † In early use, often = exile, banishment

'Outlawry, at first a declaration of war by the commonwealth against an offending member, [gradually] became a regular means of compelling submission to the authority of the courts, as in form it continued to be down to modern times' 'Before the Conquest, outlawry involved not only forfeiture of goods to the king, but liability to be killed with impunity'. In the 13th c. 'outlawry loses some of its gravity, instead of being a substantive punishment, it becomes mere "criminal process", a means of compelling accused persons to stand their trial'. (Pollock & Maitland, *Hist. Eng. Law* I. 27, 459) In the 14th c. the process was extended from cases of felony to misdemeanours and civil actions, so as to be a punishment for contempt of court in not appearing to answer an indictment or defend a personal action, or for disobedience to a judgement of the court,

Outlawry for debt was frequent down to the 18th c. Along with this extension of the process, its conditions and consequence underwent continuous mitigation, in later times, in civil actions, it was reduced to the fact that the outlawed person was incapacitated from prosecuting an action for his own benefit, though he might still defend himself.

Clandestine Outlawries. In civil proceedings, outlawry has long been obsolete, and was formally abolished by the Civil Procedure Acts Repeal Act of 1879 (42 & 43 Vict. c. 59). While it was in use, great injustice was often done in consequence of the inefficiency of the machinery for giving public notice of the fact that a defendant in a personal action had, as a result of civil process, been made an outlaw. In 1588-9, Act 31 Eliz. c. 3 was passed 'for the auoyding of secret Outlawries in Actions Personall against the Queenes Subjects'. This being subsequently considered insufficient, amending measures were introduced, and one such bill has had the singular fortune to become the formal instrument of asserting the right of Parliament to proceed to business without reference to the immediate cause of summons, by being introduced and read a first time as the first business of every session, before the reading of the King's or Queen's Speech. This precaution goes back to early times, being referred to as an established practice in 1603. Formerly some one bill was used for the purpose on each occasion, but since 1 Dec. 1743, the means uniformly employed has been a Bill 'for the more effectual preventing Clandestine Outlawries in personal actions', and this is still annually introduced, although the outlawries against which it is directed have long disappeared.

LIGGER *sb.*), subsequently corrupted in various ways by those to whom the *dial.* *lig*, to lie, was unknown. Du. has analogous uses of *utligger*, -ligger 'outlier'; but the later date of this prevents it (notwithstanding Dampier's assertion: see sense 2) from being viewed as the source of the Eng. word.]

Du. *utligger* 'outlier' appears in Kilian, 1599, only in the sense of 'stationary guardship lying out in front of a port, etc.' From 1671 (Witsen *Scheeps-bouw* 55a) it is found in a sense akin to 1 below. The 'outligger' of the Indian seas (sense 2) is described in Du. works from c 1600 without any name; in Valentin *Oud en Nieuw Oost Indien* I 2 (1724) it is called *vloer* (*i. e.* wing), the name still in common use, but beside it the name *utligger* is found in Dutch dictionaries of the 19th c. (Twent *Zeevaans Woordenb.* 147 b, 1813, etc.) Thus, so far as yet known, both uses of *utligger* are later than the corresponding senses of the Eng. word.]

Out of (au tōv), *prep. phr.* Also 1-4 út of, 4-out o, (7- o'), 4-7 out a, 4-6 oute, out(e) of [orig., and still in writing, two words, viz. the *adv.* **OUT** followed by the *prep.* **OF** (in its primary sense = from). In analysis *out of* is precisely on the same level with the obs *down of*, *up of*, and the current *forth of*, *out from*, *out to*, *down from*, and other instances of an *adv.* followed by a *prep.* which defines its relation to an object. But in OE. as in OS and the Scandinavian langs. út of (OS., ON. út of, Sw. ut af, Da ud af), became the regular equivalent of L. *ex*, Gr. *ἐκ*, *ἐκ* (while Ger. and Du. used the *adv.* itself as a *prep.*); *out of* has thus acquired a unity of sense and also of pronunciation, which entitle it to separate treatment, whereby also its own sense-development can be more distinctly exhibited.

The history of *out of* is partly parallel to that of *in to*, with the differences that the latter is now written *into* as one word, and that *out of* is the opposite, not only of *into*, but also of the static *in*. One reason why *out of* has not needed to be written as one word may be that the distinction now made between *into* and *in to* is in the case of *out* expressed by *out of* and *out from* thus 'they came in to me, into my house', 'he went out from me, out of my house'.]

Outputter and *outputter* are here applied to the same person. Either of these may be a misprint for the other, or the words may be used as synonyms. cf. *PULT*, *PUR* *Obs.* The passage (which, as printed, is incoherent and corrupt) purports to be from a prophecy of Merlin, in which *outputter* may have been the orig. word. 5. A term applied to certain maintainers and abettors of thieves or freebooters.

In *g Hen. V.* it appears from the context to be applied to persons in Redesdale who maintained and fitted out thieves for depredations in the adjacent counties. cf. senses 3 and 4. Bp. Jackson seems to have understood and used it of persons who put out their neighbours' cattle or goods into places handy for thieves with whom they were in league. cf. *OUT-PUT* v. 1. b. quot. 1615. But the *out-putters* of 1421 were not the neighbours of the persons robbed, but felons living beside the thieves in Tyndale and Redesdale.

Intakers, Quos Outparters* vocant recentius *Outputters* nuncupati.

Note. Rastell's Eng. transl. of the Statutes (ed. 1543) reads in the Act of 1421 'felons called yntakers and outparters'. An obvious misprint, which was however repeated in all editions previous to that of Ruffhead in 1763 (which retains 'outparters' in the text with 'outputters' in the margin). Hence 'outparter' was accepted as a genuine word by Cowell, who in his *Interpret* further identified the 'outparter' with the thief, with which erroneous explanation the bogus word has duly reappeared in the *Law Dictionaries* down to Wharton, as well as in Phillips, Kersey, Bailey, Ash, Crabbe, Ogilvie's *Imperial Dict.*, *Century Dict.*, and Funk's *Standard Dict.*, it was eschewed by Johnson and Webster. As if one error were not enough, Wharton has also *Outputter*, with an explanation founded upon the latter part of Cowell's article, but making 'man or house' into 'manor-house' (!) This last blunder is taken over from Wharton by Cassell's *Encycl. Dict.*, Ogilvie, and *Century Dict.* (all professing to take it from Cowell). In Hodgson, *Hist. Northumbria* pt. II. l. 60, the 'outparters' of 1543 appear in a new guise as 'outpartners', erroneously said to be used in the Supplication of 1421, which has *Out-putters*.

1607 *COWELL Interpret. Outparters, anno g. H. 5. ca. 8.* seemeth to be a kind of theeves in Ridesdale, that ride abroad at their best advantage, to fetch in such cattell or other things, as they could light on without that liberty. Some are of opinion that those which in the forenamed statute are termed out parters, are at this day called outputters, and are such as set matches for the robbing of any man or house as by discovering which way he rideth or goeth, or where the house is weakest and fittest to be entered. See *Intakers*. 1658 *PHILLIPS, Outparters*, a sort of theeves about Ridesdale, that ride about to fetch in such cattell or other things as they can light on; [ed. 1706 adds, and make Matches for the robbing of Men and Houses]. 1823 *CRABB Technol. Ovate (ōvāt), *sb.* [f. an assumed Latin plural *ovātes*, representing Ovarētes, vātes, soothsayers, prophets, mentioned by Strabo, along with *Δρυῖδαι* 'Druids', and *Βάβροι* 'Bards', as a third order in the Gaulish hierarchy. Cf. EUTHAGES.]

A term used as the English equivalent of Welsh *ofydd*, now applied to an Eisteddfodic graduate of a third order, beside 'bard' and 'druid'; the name and its application being artificially affiliated to those of the Gaulish Ovarētes mentioned by Strabo.

Note. Ovarētes was Strabo's Greek transliteration of the Proto-celtic *vātes* (Stokes), pl. of *vātis* (or **vātis*) 'soothsayer, prophet' = L. *vātis*, OIr. *faith*, mod. Ir. and Gael. *faidh*. *Ofydd* occurs in Middle Welsh as a second element in some compounds, where it appears to have the sense of 'lord' (app. for *ddofydd*, mutated form of *dofydd*). It is also the Welsh form, in 14th c. bards, of the proper name *Ovid*. It has no connexion, etymological or historical, with ovarētes. The imaginary connexion appears first in Henry Rowlands in 1792. From him it was taken up by Edward Williams (Iolo Morganwg) and W. Owen (Pughe) who introduced *ovate* as the English equivalent, 1792-4.

1793 H. ROWLANDS *Mona Antiqua* 65. Different Classes and Fraternities, which, as Sirabo (lib. iv) reckons, were three, that is *Δρυῖδαι*, *Druidau* or *Druidion*; Ovarētes, *Ofdyfyr*

or *Offyddion*; and *Bardol Beirdd* Ammianus Marcellinus (lib xv) gives the same reckoning 'inchoata per Bardos, Euvates, & Druidas', i.e., begun and set by *Bards, Euvates*, and *Druids* — *Ibid.* Of these, says Strabo, the *Bards* were Singers; the *Ovates*, Priests and Physiologists; and the *Druids* to Physiology added Ethics and Moral Learning *Ibid* 251 Their *Ovates*, so call'd by Strabo and Ammianus Marcellinus, must express some Name they had at that Time on one of their Orders, sounding like *Ovydd* or *Offydd* 1792 W. OWEN (PUGH) *Elig. Lywarc Hen*, Intro xii, *Bardd, Ovydd, a Derwydd* = Bard, Ovate, and Druid 1794 E. WILLIAMS *Poems* 11. 230 There are three orders of the Primitive Bards. — The *Ruling Bard*, or Primitive Bard positive the *Ovate* (or *Euvate*) whose avocation it is to act on the principles of inventive genius and the *Druid* [etc.] 1834 PLANCHÉ *Bris Costume* 11 The Priesthood was divided into three orders The *Druids*, the *Bards*, and the *Ovates*. The *Ovate* or *Ovydd*, professing astronomy, medicine, &c., were green, the symbol of learning. 1877 RHYNS *Lect. Welsh Philol* vi. 314 *Offydd* is defined to be an Eisteddfodic graduate who is neither bard nor druid, and translated into ovate.

b. The OE. use, in quot. 893, is sometimes expressed in ME. and mod Eng. by *over* following the time phrase; as in *all the year over, the whole day over*. Cf. the corresponding local use in sense 7 d. In the temporal use, *over*, being appended to a phrase which is itself an adverbial adjunct, may with equal propriety be viewed as an advb.: cf. 'he works in the field all day', with 'he sings at his work all day over', i. e. all day from beginning to end.

Over, sb² [Absolute use of OVER adv.]

1. (*nonce-use* f. OVER adv. 11.) That which is excessive; an excess, extreme.

a 1584 *MONTGOMERIE Cherrie & Slae* 435. All ouirs are reput to be vyce; Ore rich, ore law, ore rasch, ore nyce [etc.] *Mod. Sc. A'* owes is ill (i. e. All excesses are evil).

2. An amount in excess, or remaining over; an extra.

1822 *Pall Mall G.* 10 Oct. 3. It does not appear in the accounts, nor does 'overs'. 1886 *Rep. of Sec. of Treasury* (U. S.) 180 (Cent.). In counting the remittances of bank-notes received for redemption during the year, there was found \$25,528 in overs, being amounts in excess of the amounts claimed, and \$2,246 in shorts, being amounts less than the amounts claimed.

3. An act of going over or across something; a leap over a fence, etc. in hunting.

1883 *Pall Mall G.* 30 July 5/2. The downfall of the front rank at an over.

4. *Cricket* (f. OVER adv. 5 c.) The number of balls (four, five, or six) bowled from either end of the wicket before a change is made to the other end; the portion of the game comprising a single turn of bowling from one end.

1850 'Bart' *Crick Man.* 48. Some clubs make it a rule to mark the number of 'overs' that each bowler gives, at the foot of the scoring papers. 1859 *All Year Round* No. 13. 305. He caught two of the town off my first 'over'. 1899 *Westm. Gaz.* 18 Nov. 2/3. The first alteration proposed—the substitution of six balls for five in an over.

Over (ða vət), a. Forms: a. 1. *ufere*, -e, 2-3. *ufere*, 3. *uere* (= *uvere*) (*mod. dial.* *uover*). β. 3-5. *ouere*, 4-7. *ouer*, 5- *over*. [OE. had *ufer(r)a*, -e, *ufer(r)a*, -e adj., the former of which survived in early ME. *ufere*, *uvere* (written *uvere*, *uure*), for which in writing *over* (e was substituted bef. 1300. (Cf. OHG. *obari*, MHG. *obere*, Ger. *ober*, which represents an OTeut. **ubaro*, while the OE. forms repr the types **ubari*-o, **ubir*-o.)

Dialectally, the form *uover* (wvov) is still widely current for the adjective (see E. D. D.); so that the ME. spelling *over* (e as in the later Layamon text for the earlier *uvere*) may originally have been given only graphically, *ou* (or) for *u* (or *ui*, *ui*), as in *above*, *above*, *love*, etc. But in ME. the adj. fell together in use with *Over* adv. in comb. from which indeed it cannot always be separated, many important examples being written either way; thus, the OE. *ufera lippa*, in mod. dial. *uoverlip*, occurs in Chaucer MSS. as *over's lippa* and *overlippe*. This would naturally tend to level the pronunciation of *over* from *ufere* with that of *over* from OE. *ofer*, a result prob. completed in Standard Eng. during the M.E. period. And this identification led further to the adjectival use of the adverbial prefix in other senses: e.g. 3. 4.

Although originally itself a comparative form, *over* having no positive of its own has been in some respects treated as positive, and has been compared *OVERER* *OVEREST* (so OHG. *obardro*, *obardst*, mod. Ger. *oberer*, *oberst*), and *OVERMORE*, *OVERMOST*, only the last of which is now in (occasional) use. See these.]

OVER- is used with adverbial, prepositional, and
adjectival force, in combination with sbs.; with
adverbial and prepositional force in comb. with
verbs, with adverbial force in combination with
adjs., advs., and prepositions. Its combinations
are therefore exceedingly numerous, and, from the
wide range of its meaning, very diverse in character.
The following are the chief classes; but many

words have senses falling under two, three, or
more of these, and there are individual words in
which the original sense of the prefix is so modified
that it is difficult to assign them to any class. In
some of its uses, moreover, *over* is a movable ele-
ment, which can be prefixed at will to almost any
verb or adjective of suitable sense, as freely as an
adjective can be placed before a substantive or an
adverb before an adjective. Although usually
hyphenated or even written as one word, such com-
binations are hardly dictionary facts; they are really
syntactic combinations which make the use and
construction of *over* in the particular position more
clear and obvious. In some of these combinations,
however, there is a closer unification of sense, and
others have a long history which it is desirable to
show. All important combinations of *over-*, there-
fore, including such as occur in more than one
sense, and all such as seem to require explanation,
are treated as Main words in their alphabetical
places, of the unimportant or obvious ones, ex-
amples are here given under the classes to which
they belong, with a few illustrations; but no
attempt is made to enumerate all that have been
used, much less all that are possible.

Over (like *ufar* in Gothic, *uor* and *ober* in OHG.,
o-bar in OS., *iber* in Ger., *ouer* in Du., *ofer*, *ofr*, *of* in ON)
was already in OE. used in comb. with vbs., as *ofercumban*,
ofercuman, *oferdan*, *oferdrucan*, *oferdruban*, with sbs., as
oferaldornum, *oferbrith*, *oferseht*, *oferstop*, *oferwrit*, *oferwrit*,
oferwritnes, with adjs., as *ofergylden*, *ofermæte*, *ofermodig*,
oferblithe, *oferfull*, *ofermucel*, also in advs. formed from
adjs., and in derivatives of phrases, as *oferseht*, *ofersewisc*
from *ofer se*. Many of the OE compounds are still in use,
but the more part failed to live into ME., and the great
majority of existing *over-* combinations are of later forma-
tion, chiefly since c 1550.

For the original stress of verbal and nominal compounds
respectively, and later modifications, see *Over-*. As *over* is
of two syllables, there is necessarily a subordinate stress on
o, even in verbal compounds, where the main stress is on the
root syllable. This rises in sense 27 to a distinct secondary
stress, distinguishing e.g. *over-be* and 'bend too much' from
over-be and 'bend over'. In verse, the unstressed *over-* is
often reduced to *o'er*, a single stressless syllable, as *o'er-
be* and, *o'ersta* down, but *over-* with main or secondary stress
is not properly reduced to *o'er* unless the position allows
the stress to be retained, as in *o'er-magnanim*, *o'er-in-
carn*, *o'er-assu*, *o'er-nation*, *o'er-reglection*. See senses 27-30.

1. Over- in spatial and temporal senses, and in
uses directly related to these.

1. With verbs, or with sbs. forming vbs., in the
sense 'over in space, on high, above the top or

overtopping', as *OVER-RISE*, *-TOP*, *-TOWER*; and (*c*)
with the sense of position implying other notions
of which it is a condition or element, as *OVEREYE*,
OVERLOOK, *OVERJOY*, *OVERWEEP*, which see.

The compound verb is equivalent sometimes to the simple
vb. with *over* adv., as in *OVERLAY*, to lay (something) over;
or, more frequently, to the simple vb. (usually intr.) with
over prep., as in *OVERHANG*, to hang over (something), *OVER-
LIT*, to lie over or above (something), but in many cases, as
OVERARCH, it is difficult or impossible to distinguish these

a 1656 *Br. Hall Invis World* III 1, Those 'over-excelling glories of the good Angels 1823 *FORD 'Tis Pity* v. v, How 'over-glorious art thou in thy wounds, Triumphant over infamy and hate!

26. With the sense 'to a greater extent, or at a greater rate, than is usual, natural, or intended; too far'. In verbs, as OVERACT, -BID, -BUY, -CARRY, -COUNT, -ENTER, -ESTEEM, -ESTIMATE, -HOLD, -LAUNCH, -LET, -PAY, -PRIZE, -RATE, -SELL, etc. In adjs., as OVERAWFUL, etc.

27-30. With the sense 'in or to excess, too much, too'. Now a leading sense of *over-* in combination with verbs, adjectives, substantives, and adverbs

In mod Eng. very common with a negative (esp. in adjs. and their derivatives), as in *not over-brave*, *not over-obliging*, 'he was not over-pleased with the result', in which *not over-* is said by lotes for 'not quite enough', 'somewhat deficiently': *not over-wise* = rather wanting in wisdom.

This sense was approached in Gothic by the adj. *ufarwaksan* 'full to overflowing', and the vb. *ufarwaksan* 'to grow exceedingly' (repr. Gr. *ὑπερβάλλω*); it was frequent in ON, expressed by *ofr*, *of*, before adjs., nouns of quality and action, rarely with vbs.; occasional in OHG. *ubaregan*, *ubarinchan*, *ubrenkan*, *ubarfult* cf. MHG *uberoet*. In OE. it occurs in many adjs., a few vbs., and numerous derivative or other sbs. In OE. and the cognate langs, *over* was in true combination; its generalized use in mod. Eng. renders it much more a distinct element, often merely in syntactical combination, so that, except in a few words of old standing, it is usually hyphenated to the word which it qualifies.

In verbs, there is a distinct secondary stress on *over* which may, in case of antithesis or emphasis, become the main stress. Adjectives, substantives, and adverbs have normally even stress *over-act*, *over-able*, *over-able*, *over-awful*, *over-often*; either stress being liable to be subordinated, according to the construction and emphasis. Thus, an *over-act* scholar, we think him *over-a-ct*, we want culture, not *over-act* culture. In this sense, *over* is rarely contracted in verse to *o'er*, and properly only where the stress can be retained, as in *o'er-embow'd*.

27 With verbs (or with sbs. or adjs. forming verbs) A few occur in OE., e.g. *oferdon*, -*drenca*,

Overtake (*ovvartak*), *v.* [Early ME f. *OVER-14* + TAKE *v.* q. v. for Forms.]

Overtake is the earliest exemplified of a small group of synonymous vbs., including *overrun*, *overhent*, *overget*, *overcatch*, in all of which the second element means *take* or *catch*; the original application being apparently to the running down and catching of a fugitive or beast of chase of the synonymous 'catch up'. The sense of *over-* is not so clear. *A priori* we might explain it as 'to take by over-running, or by getting over the intervening space', and compare *overreach* = reach *over* or across a space. But it is doubtful whether this was the original notion. Beside these *-take* verbs, a fig. sense of *overtake* (viz. 4, below) was expressed before 1000 by *overgange* and *overgo*, but in these *over-* can be explained in the sense 'down upon' (*OVER-7*), so that their orig. sense would be 'descend' or 'fall upon'. The sense of 'overtake' was expressed later also by *overhie*, *overrun*, *overhale*, *overhaul*, but these prob. imitated *overgo* or *overtake*. In Early ME *overtake* and *overgo* had the parallel forms *oftake*, *orgo*, which seem to have been the strictly southern equivalents (*oftake* being actually exemplified earlier than *overtake*) the relation between *of-* and *over-* here, as well as in *OFTHINK*, *OVERTHINK*, has not been clearly determined.]

Owe (au), v. Forms see below. [Comm. Teut.: OE. *agan*, pres *ic dh*, pa. *ic dhite* = OFris. (*aga*), *deh* (*hdeh*), *dehte*, OS. *egan* (*eh*), *ehita*, OHG. *eigan*, ON. *eiga*, *é*, *ditta*, Goth. *agan*, *aih*, *ahita* one of the original Teutonic preterite-present verbs (see CAN, DAB, DOW, MAY). The OTeut. *ag-*, *aih-*, answers to a pre-Teut. *ak-*, ablaut-grade of *ik-*, the original stem of the present cf. Skr. *ip* to possess, own. This vb. now survives only in Eng. and the Scandinavian langs. (Sw *aga*, *ega*, Da. *æge* to own, have). In Eng it has undergone much change both of form and sense. The original preterite inflexion of the present tense (*dh*, *dht* *dhist*, *dh*, *dht*) began in late OE. and early ME. to be supplanted by the ordinary pres tense forms (e.g. 3rd sing., *dhit*, *awep*, *owep*, *awes*, *owes*, pl *dgead*, *ajep*, *ojep*, *oweth*, etc.); and in mod Eng the tense is entirely thus levelled, *ow*, *owest*, *owes*, *-eth*, *owe*. The OE pa t *dhite*, ME. *dhte*, *dhte*, survives as *ought*, but before 1200 this began to be used (in the subjunctive) with an indefinite and hence present signification, in a special sense, and thus gradually came to be in use a distinct verb from *owe* (for which see OUGHT v.), its function as pa. t. of *owe* being supplied in 15th c. by *owed*. The orig pa pple in all the Teut. langs became an adj., of which the mod Eng form is *OWN* a., but as a pa pple. OE. *agan* was still used in 16-17th c. as *owen*, *owne*. A later pa pple. *awht*, *ought*, conformed to the orig. pa. t., is found from the 14th c. see OUGHT v. 7. The current pa pple. is *owed*, so that the whole verb has now the ordinary weak conjugation *owe*, *owed*, *owed*. The change of signification from *habere* to *debere* can be best traced in the scheme of senses below; but the primitive sense 'have, possess' is not yet extinct in the dialects, which use *awe* or *owe* = *own*, and have not entirely lost the connexion of *owe* and *ought*.

OUGHT, being now in Standard English practically a distinct word, has been fully treated in its alphabetical place, and is not dealt with here; but, for the historical development, the two articles OWE, OUGHT, should be read together.]

II. To have to pay.

This branch and the next were expressed in OE., as in the other Teutonic langs., by the vb. *sculan*, pa. t. *scolde*, inf. *sculan* (Goth. *skul*, *skulda*, *skulan*), mod. Eng. *SHOULD*. The first traces of the mod. use appear in the Lindisf. Gloss, which renders L. *debere* (where the *Rushw.* like the later Ags. *Gosp.*, uses *sculan*) by the phrase *agan is geldanne* 'to have to pay'. Examples are wanting during the following two centuries to show the stages by which this was shortened to the simple *agan*, which is found by 1175 in full use, both in the sense 'to owe (money)', and 'to have it as a duty', 'to be under obligation (to do something)', in both taking the place of OE. *sculan*. (See also OUGHT v. 2, 5.) The result was that *shall* gradually ceased to have the sense 'owe', retained that of obligation with a weaker force, and became mainly an auxiliary of the future tense; while *agan*, *agen*, *owen*, *owen*, in taking *debere* as its main sense, has in Standard Eng. lost that of *habere*, or handed it over to the cognate *Owe*, which shares it with *have* and such Romance synonyms as *possesse*.

2. To be under obligation to pay or repay (money or the like); to be indebted in, or to the amount of; to be under obligation to render (obedience, honour, allegiance, etc.) Const. with simple dat. or *to*. (The chief current sense.)

Oxalic series (of acids) the dibasic acids derived from the glycol, which differ from the *lactic* or *monobasic* series by having an additional atom of oxygen in place of two of hydrogen; they include Oxalic, Malonic, Succinic, Pyrotartaric, Adipic, Fimelic, Suberic, Azelaic, Sebaccic, Brassylic, and Roscellic acids (Roscoe *Elem. Chem.* (1874) xxvii).

2. Chemical words, in which *oxy-* is taken as the combining form of OXYGEN (cf. HYDRO- d); denoting either simply the presence of oxygen, as in OXYACID, OXYGEN, †oxybase, or the addition of oxygen to the substance denoted by the simple word, and thus practically = *oxygenated* or *oxidized* For special uses, see OXYCHLORIDE, OXY-SULPHATE, and other main words. A looser use is seen in oxy-alcohol (or oxy-spirit), oxy-coal-gas, oxy-house-gas, oxy-ether, terms applied (after OXYHYDROGEN, OXYCALCIUM) to the flame produced by mixing the vapour of a spirit lamp, ordinary house-gas, or sulphuric ether, with oxygen; so oxy-alcohol blowpipe, lamp, etc.; oxy-paraffin a., applied to a paraffin lamp with arrangement for complete oxygenation of the flame.

But the most frequent use of *oxy-* is as a prefix to names of organic substances, to denote a derivative or related compound in which an atom of hydrogen is displaced by one of hydroxyl (HO); in which sense the more accurate *hydroxy-* is now often preferred — see OXYACID 2

In earlier use often spelt *oxi-*; before a vowel sometimes reduced to *ox-* — see *Ox* 1

The more important of the *oxy-* compounds are treated as main words; the *oxy-* or rather *hydroxy-* organic compounds are unlimited in number, including e. g. *oxy* or *hydroxy-acetal* (CH₂(OH)CH(OC₂H₅)), *aldehyde* (CH₂(OH)CHO), *anhydracetic* (=anhydracetic), *benzene* or *benzol* (=phenol, C₆H₅OH), *benzyl*, *camphor* (C₁₀H₁₈O), *camphene* (C₁₀H₁₈N₂O), *caproamine* (=leucine), *cholone* (=betaine), *cinchonine* (C₁₉H₂₂N₂O), *cinchonine* (=carvacrol, C₁₀H₁₈O), *dimorphine* (C₁₄H₁₈N₂O), *guanidine*, *glycolylurea* (=allanturic acid), *lanthopine*, *methyl*, *methylamine* (=formaldehyde), *morphine* (C₁₇H₁₉NO), *naphthylamine* (or *naphthylamine*, C₁₀H₇NO), *narcotine* (C₂₃H₃₃NO), *neurine* (=betaine), *phenol* (=pyrocatechin); *phenyl* (C₆H₅OH), *quinine*, *quinoline* (=carbostyryl); *strychnine* (C₂₁H₂₃N₃O), *sulphobenzamide*, *thymoguinone* (C₁₀H₁₂O), *toluene* (=cresol, C₇H₈O), *tylosyl*, etc.

Also in the names of oxy- or hydroxy-acids, as *oxy-acetic* (=GLYCOLLIC); *anhydralic*; *benzoic* (C₇H₆O₂), *butyric* (C₄H₈O₂), *caproic* (=leucic), *chelonidic* (=meconic), *cholic*; *cumamonic* (NH₂ C₁₀H₁₉O OH), *cuminic* (C₁₀H₁₂O), *guanic* (C₄H₁₀O), *hippuric* (C₉H₉NO), *isomuric* (C₉H₉O), *isouric* acid (=purpuric), *mandelic* (=phenylglycollic), *mesitylenic* (C₉H₁₀O), *naphthoic* (C₁₀H₇OH), *oxalic*; *phenic* acid (=pyrocatechin), *picric* (=stypnic, C₆H₃N₃O₇), *propionic* (=lactic); *salicylic* (=gentisic, C₆H₅(OH)COOH); *lannic*; *terephthalic* (C₈H₆O₄); *tolic* (C₇H₇O); *toluamic*, *tolonic* (=cresotic, C₈H₉(CH₃)(OH)CO₂H), *trimesic*; *uric*, etc.

2 *Organic Chem* In plural, a name given to several series of acids derived from those of the fatty or the aromatic series, by the substitution of one or more hydroxyl for one or more hydrogen atoms; hence called more exactly *hydroxy-acids*.

The diatomic monobasic acids derived from the fatty acids (C_nH_{2n}O₂) have the formula C_nH_{2n}O₃, and constitute the *fatty oxy*, (*hydroxy-fatty*, or *lactic* series. The diatomic monobasic acids derived from the aromatic group or benzene derivatives (C₆H₄-a₂) have the formula C₆H₄-a₂O₃, and constitute the *aromatic oxy-acids* or (*hydroxy-aromatic* series.

1877 WATTS *Formes Chem* (ed. 12) II 317 These acids are called *lactic acids*, after the most important member of the series, and *oxy-fatty acids*, because they may be derived from the acids C_nH_{2n}O₂ by substitution of OH for H, thus:

CH₃CO₂H Acetic acid, CH₃OH-CO₂H Oxycetic acid. *Ibid.* 534 These aromatic oxy-acids, like the corresponding acids of the fatty series (the lactic acids), exhibit alcoholic as well as acid characters. 1885 RASMUSSEN *Introd Organ Chem.* 155 The first class which presents itself is that of the alcohol acids or acid alcohols; that is, substances which combine within themselves the properties of both alcohols and acids. 1. One of the non-metallic elements, a colourless invisible gas, without taste or smell. Symbol O atomic weight 16.

It is the most abundant of all the elements, existing in the free state (mixed with nitrogen), in atmospheric air, and, in combination, in water and most minerals and organic substances. It combines with nearly all other elements (forming *oxides*), the process of combination being in some cases so energetic as to produce sensible light and heat (*combustion*), in others very gradual, as in the rusting or *oxidation* of metals. It is essential, in the free state, to the life of all animals and plants, and is absorbed into the organism in *respiration*, hence it was formerly called *vital air*. Priestley, who isolated it in 1774, holding it to be common air deprived of Phlogiston (q. v.), called it *dephlogisticated air*.

Oyer and terminer (oi'ar and tɜ'mɪnər) *Law* The Anglo-Fr. phr. *oyer et terminer* 'to hear and determine' partly anglicized. *a*. In Anglo-Fr. used in proper verbal construction, and also, in *commission d'oir et de terminer*, as a *sb* phrase = 'hearing and determining' (cf. -ER 4). *b*. In English chiefly in the latter construction, as in *Commission of oyer and terminer* († *of oyer and terminer*, *of oyer determiner*, = Afr. *de terminer*), a commission formerly directed to the King's Judges, Sergeants, and other persons of note, empowering them to hear and determine indictments on specified offences, such as treasons, felonies, etc.; special commissions being granted on occasions of extraordinary disturbance such as insurrections. also called *Writ of oyer and terminer*. Now, the most comprehensive of the commissions granted to judges on circuit, directing them to hold courts for the trial of offences. Hence in such phrases as *Commissioners or Justices of (or t'm) o. & t.*, *writ, court of o. & t.*; and † (c) elliptically, for 'commission or court of oyer and terminer'.

Ozone (ōz ōn) *Chem.* [*a*. *F. ozone* (1840), *f.* Gr. *ōzēiv* to smell + -ONE] An allotropic or altered condition of oxygen, existing in a state of condensation (having three atoms to the molecule, O₃), with a peculiarly pungent and refreshing odour

It is produced in the electrolysis of water, and by the silent discharge of electricity or the passage of electric sparks through the air (whence it is sometimes perceived after a thunder-storm), it is more active than ordinary oxygen, is a powerful oxidizing agent, liberates iodine from potassium iodide, and, when heated, breaks up into ordinary oxygen, expanding by half its volume

Assoc.* (1841) 214, I shall consider the odiferous principle as an elementary body and call it 'Ozone', on account of its strong smell *Ibid* 217, I do not, therefore, hesitate to ascribe the familiar electrical odour to ozone 1871 *M. P.

P the sixteenth letter of the alphabet in English and other modern languages, was the fifteenth in the ancient Roman alphabet, corresponding in position and value to the Greek Π , π , earlier 𐌱 , 𐌲 , originally written from right to left 𐌱 , and identical with the Phœnician and general Semitic 𐤐 , forms of which were 𐤐 , 𐤑 . During its whole known history the letter has represented the same consonantal sound, viz. the labial *tenuis*, or lip unvoiced stop, to which the corresponding sonant or voiced stop is B, and the nasal, M. In English, the simple *p* has always this sound; but it is sometimes silent, as initially in the combinations *pm*-, *ps*-, *pt*- (representing Greek $\pi\psi$ -, $\pi\sigma$ -, $\pi\tau$ -), and medially between *m* and another consonant, as in *Hampstead*, *Hampton*, *Sampson*, *Thompson*, *Dempster*, *Tompkins*, where it is not etymological, but has the function of indicating for the preceding *m* the short and semi-sonant value which *m* naturally has before pronounced *p*. cf. *Simpson*, *crimson* (sɪmˈsɒn, kriˈmzən), with *wimple*, *wimble*. In words from Latin, such as *exempt*, *tempt*, *peremptory*, *assumpsit*, *consumptive*, *redemption*, and some others, as *Humpty-Dumpty*, where the *p* is (so far as English is concerned) etymological or consciously derivational, there is generally in careful utterance an intention to pronounce it, resulting in an incomplete *p*, which we indicate thus *tem^pt*, *ride m^pʃən*, but, in rapid or careless utterance, the *p* disappears, just as in *Han^pton*, *Thom^pson*. The digraph PH, *ph*, is used, in continuation of Latin usage, to transliterate the Greek letter ϕ , ϕ , the phonetic value of which is now identical with that of F. The words beginning with PH have thus the same relation to the P words proper that those in CH have to the C words; that is, they constitute an alien group, which, only for alphabetical convenience, occupy a place in the midst of the P words proper, between Pe- and Pi-.

Original P in Germanic or Teutonic represents an Indo-European B. But, *mutually*, B was of rare occurrence in Indo-European, and it is not certain that any of the words in which it so occurred were retained in Teutonic, where initial P was consequently very rare. Of the OE. words in P, a few were apparently Common West Germanic, a very few, Common Teutonic; of many of the remainder the origin is quite obscure, but the majority were manifestly adoptions within the historical period from other languages, chiefly from Latin. Notwithstanding these extraneous additions, P remained the smallest initial letter (the exotic K, Q, not being counted) in the Old English or Anglo-Saxon vocabulary, occupying less than half the space of I, and little more than two thirds of that of Y. Its relation to the other mutes, C (= K) and T, and to its own sonant B, is seen by the pages which these occupy in Toller's edition of Bosworth's Anglo-Saxon Dictionary, which are C 50, T 64, B 78, P 83 pages. P might be expected to comprise a correspondingly small part of the modern English vocabulary; on the contrary, it is actually the third largest initial, being surpassed only by S and C, with which it forms a triad of gigantic letters, which include nearly a third of all the words in the dictionary. This result is mainly owing to the vast accessions from Greek, Latin, and the modern Romance languages (chiefly, of course, from French), and especially to the enormous number of words formed with the Latin prefixes *per*-, *post*-, *pre*-, *pro*-, and the Greek *para*-, *peri*-, *pro*-, along with the PH group already referred to. But, besides these, P has received great additions, not only in later times from Oriental, African, American, and other remote languages, but, during the Middle English and Modern periods alike, of a multitude of common, familiar, or lower-class words from sources which cannot be traced, often apparently from fresh word-formation. P thus presents probably a greater number of unsolved etymological problems than any other letter.

[*Notes.* As to the origin of these things has been ascertained. An obvious suggestion is that *b* (for which the evidence does not go far back) refers to the difficulty which a child beginning to read has in distinguishing the tailed letters p and q, others have conjectured some cryptic reference to the word, *peculiar*, or *particular*. There is no necessary connexion between *b* and *a*, which belongs to an earlier date. In a still earlier passage from Dekker 1602, 'Now thou art in thy *pee* and *cue*', *pee* means the coat so called (see *Pea* *sb*), and *cue* aptly either *queue*, or *Cue* *sb* 3 sense 3 or 4; but there may have been a punning allusion to the expressions here considered, if they were then current.]

Pack (pæk), *sb.* 1. Forms: 3-7 *packe*, 4-5 *pakke*, (4 *pakke*), 4-6 *pak*, (5-6 *pake*), 4- *pack*. [ME. *packe*, *pakke* (early 13th c.) corresponds to early MFlem. *pac* (13th c.), MDu (a 1300), MLG, Du, LG. *pak*; (late) MHG. and Ger. *pack*; also Icel *pakki* (1337), Sw. *paka*, Da. Norw *pakke*; obs. F. *pacque* (c1510 in Godef.), AngloL (15-16th c) *paccus*, mod It. *pacco*; mod Ir *pac*.]

App. immediately from Flemish, Dutch, or Low German in 12th c. The earliest instance of the word yet recorded is of 1199 at Ghent, in Warnkönig *Ghelfold Hist de Gand* 236 'Omne pac, quod in curru feritur, sive parvum, sive magnum, si fuerit fuculamentum, debet quatuor denarios.' *Pac* occurs also at Utrecht in 1244 (Höbhlmann *Hans Urkundenbuch* I 100). The verb (*PAC* v.) appears at an early date in connexion with the wool trade, and it is known that the trade in English wool was chiefly with the Low Countries. The Fr. examples of *pacque* and *pacquin* packhouse (at Ghent and Lille) are prob from Flemish. Utterior history and origin unknown. The conjecture (in Diez, Körtig, etc.) that *pac* is Romance, seems ill-founded, the 'late L. *paccus*' being merely Anglo-Latin, i. e. the latinized form of Eng *pac*, the word is quite late in Ir. Irish *paca*, *pac* is from Eng (Senses 8-12 below, esp 10-12 are rather from *Pack* v.)

† Pack, v 2 Obs [Origin obscure: cf. **PACK sb** 2] The sense, both in *vb* and *sb*, suggests some connexion with **PACK sb** (also **COMPACT sb** 1), the implication here being however always bad. As to the form, though final *-t* is commonly reduced in *Sc* and in some mod *Eng* dial to *c* or *k* (e.g. *ack, fack, correck, direct*, etc.), we have no evidence of such change in Standard *Eng* of 16-17th c; yet a confusion between *pack* and *pack's*, *pack'd*, is conceivable. On the other hand, no connexion is apparent between sense 1 and any sense treated under **PACK v**; hence this has been provisionally ranked as a separate word. But the later senses, esp 4 and 5, appear to arise from a blending of this with **PACK v**, with which they are now in feeling associated. So with **PACK sb** 2]
